

The Rollout Roadmap

A strategic path to
unlocking value for
healthcare systems

NELSON

At NELSON Worldwide, unlocking value begins long before the first drawing is finalized or the first site is selected. It starts with **strategy**. We work with healthcare systems and developers to prioritize target markets that align with population health needs, reimbursement potential, and access gaps. By defining the patient journey and operational goals early, we lay a strong foundation for success.

Our **experience-driven** design process transforms insights into action. We create repeatable prototypes that offer flexibility across service lines, integrating care pods, digital infrastructure, and adaptive space strategies that elevate both patient care and operational efficiency. Every design decision is intentional, with a clear line of sight to improved throughput, reduced fatigue, and longterm scalability.

Accelerated development tactics like adaptive reuse and modular-ready approaches help reduce permitting delays and expedite delivery. By aligning early with compliance and inspection pathways, we reduce risk and unlock value from day one, bringing facilities online faster and with greater confidence.

As projects move toward opening day, we design for **operational readiness**. Spaces are built to support evolving technologies, reduce staff burnout, and streamline clinical workflows—all of which translate to better patient experiences and stronger outcomes.

And we don't stop at launch. Using phased pilots and real-time feedback loops, we help sharpen each rollout over time, ensuring every successive site is smarter, faster, and more impactful than the last.

This is how NELSON unlocks value at every step: through thoughtful planning, flexible design, and a relentless focus on **performance** that lasts well beyond opening day.

**STRATEGIC
PLANNING**

**PRIORITIZE MARKETS. DEFINE PATIENT JOURNEY.
MAP PATIENT FLOW. ALIGN ON GOALS.**

**EXPERIENCE-DRIVEN
DESIGN**

PROTOTYPE LAYOUTS. EMBED CLINICAL FLEXIBILITY.

**ACCELERATED
DEVELOPMENT**

USE ADAPTIVE REUSE AND STREAMLINE PERMITTING.

**OPERATIONAL
READINESS**

**SUPPORT STAFF. STREAMLINE CARE.
ENABLE TECH.**

LAUNCH + SCALE

PILOT. ADAPT. EXPAND WITH SPEED.

What Separates Winning Rollouts

Successful rollouts don't happen by chance, they're the result of early alignment, clear priorities, and adaptable planning. When teams work together from day one, every decision builds **momentum**. Spaces are designed to serve real clinical needs today and flex for tomorrow. It's how we unlock value, by transforming rollout complexity into strategic advantage.

NELSON Worldwide: Your Strategic Design Partner

We understand that expanding care delivery isn't just about growth—it's about wise **investment**.

NELSON Worldwide brings together design, development, and operational insight to streamline rollouts, reduce risk, and maximize value for health systems, developers, and builders.

Let's unlock the next era of community-based care,
maximizing

RETURN, REACH, AND READINESS

with every move.
